## 9 Good Reasons Why Access to Cash Should be Protected

1. Cash always works without electricity and/or signals.
2. Cash can quickly be handed to family and friends alike.
3. Cash ensures digital privacy. Banks, businesses, and the government can not see what you are purchasing or selling
4. In a cashless society if the government closes the "banks" you have no access to your money.
5. Cash makes it easier to budget and keep track of your spending.
6. A cashless world would give banks a free hand to change negative interest rates with no escape.
7. Social credit systems can be rolled out and you can easily be cut off from your own money.
8. Saves your business on credit card fees
9. No forced use by date with cash- unlike possible outcome for digital.
